

## Common Danger Mini Expansion

The Common Danger Mini Expansion can be included in games of 2 or more players.

Place the Common Danger Board next to the game Board.

At the beginning of the Bribe Phase, **after all abilities and/or triggers have been resolved**, count the number of Danger tokens on all players' Danger Tracks. If the total is greater than twice the number of players, add a Danger token on the Common Danger Board (on the leftmost available slot).

Any Danger token added on the Common Danger Board during each Round must remain there for the remainder of the game.

When paying Bribe, each player must pay the resources indicated on the Common Danger Board based on how many are on it, in addition to any basic resources paid for any Danger token on their own Danger Track.

Players must pay Bribe for the Common Danger, even if their own Danger Track has no Danger tokens on it.

**Example:** In a 3-player game, during the Bribe Phase of the 1st Round, the total number of Danger tokens in all Danger Tracks is greater than 6, so one Danger token must be added on the Common Danger Board. All players will have to pay 1 Time token in addition to any basic resources they pay for their normal Bribe payment.

All players who are unable to pay any of the required resources on the Common Danger Board, must lose 1 Fortune Point for each resource they cannot pay.
